

Model 202

**PULPER
REFINER
FINISHER
SEPARATOR**

The Brown Model 202 is readily adapted for applications of pulping or finishing by changing the screen hole size in the range from .375" to .010". An inlet impeller for breaking or macerating material is available as an optional accessory. Such diverse materials as apricots, tomatoes, pumpkin, pears, apples, plums, berries, prunes and figs can be satisfactorily reduced to pulp free of seeds, skins and fiber. Products such as citrus juices, jam, soup, peanut butter, jelly and fruit nectar can be finished to uniform consistency. A built-in CIP system utilizing patented rotary wash nozzles insures complete internal clean-up.

Category	Product	Application
